

Fits most grain head brands

Easy to install

Just 4 bolts per piece

Made from top quality plastic

Save Money • Stop Slugging • Less Grain Shatter

For pennies on the dollar, you can make your auger into a full-finger auger. With one Grain Grabber between each flighting, you can run your reel higher and out of the crop which means less shattering. Your grain will feed more evenly with our Grain Grabber, reducing slugging and allow you to run longer at night. Each Grain Grabber comes with its own hardware. Grabbers are

sold individually or as a kit. The kit includes Grain Grabbers, self-tapping bolts, and drill bit. Grain Grabbers are placed in the middle of auger between the flighting. Using the drill bit included in your kit, position the Grain Grabbers 1/4 turn back on each side. This will feed the grain evenly.
